[57] ABSTRACT

An automatic accounting processor and method for automatically performing an accounting procedure for transaction data on a real time basis through menu selection and input or a data communication network on a computer system, by standardizing, formulating and compounding a management control business of an enterprise. The automatic accounting processor includes a transmitter/receiver, a display/input unit, a storage unit, a processing unit, and an output unit. The automatic accounting processor and method allows an automatic accounting procedure without an accounting knowledge. Also, an accounting procedure and a balancing operation procedure are performed on a real time basis, by automatically controlling errors generated during the accounting procedure, thereby realizing an effective management control.
